

## <https://restream.io/> - ein Multi-Streaming Service

Hier gleichzeitig streamen nach facebook.com und youtube.com.

### **Tipp:**

zuerst beide auf „on“ dann erst OBS „Stream starten“

What is Restream?

[Restream](#) is a powerful and effective multi-streaming service that allows you to broadcast your live content to more than 30 streaming platforms simultaneously. Stream to YouTube, Facebook, Twitter, Twitch, and other popular platforms all at once, from one account. There is no limit on the number of platforms you can stream to!

Is it possible to watch live streams in Restream?

No. Restream allows you to multistream your live videos to the end platforms, like Facebook, YouTube, Twitch, and LinkedIn, but it doesn't support watching live streams from the account.

Is it free?

Restream offers a number of plans. Our [Free plan](#) allows you to multistream to 30+ platforms simultaneously without any limit in the number of platforms. Keep in mind, however, that [Restream branding](#) will be visible in LIVE streams for Free and Standard plans.
